South West Pinnacle

ENVIRONMENTAL POLICY

South West Pinnacle Exploration Private Limited recognises the need to protect the environment in order to allow sustained economic development for the long-term benefit of the community. They are committed to ensuring that environmental responsibility be incorporated as part of their normal business practice. It is the duty of all employees to exercise care in their work to ensure this commitment is achieved.

Listed below:

- Client requests, with regard to the treatment of sites and leases, must be taken into account prior to the commencement of operations.
- While on site, vehicles and equipment are only to be driven on designated roads, unless alternate arrangements have been authorised by the client.
- Areas of undisturbed bush and environmentally sensitive areas are to be accessed, only with consent of the Mine or Exploration Manager.
- All waste goods, food, tyres and broken equipment, are to be disposed of properly, at a designated waste facility.
- The use of chemicals, salt water or any other fluids must be controlled in the correct manner. This particularly applies to cleaning up immediately and containing any fuels, oils, greases or chemical substances that may contaminate any areas of ground or waterways.
- All legislative requirements must be fully complied with an updates or changes in the Act and Regulations must be communicated to all employees, and
- On completion of each drilling program, the disturbed area is to be left clean and tidy, as close as possible to its original condition.
- Where necessary engage the services of expert external personnel to advise on environmental matters.

The aim of the environmental policy is to provide realistic and achievable goals for all personnel involved in the company's activities
